

### **Fleet Management**

# **On-Board Computers**

Replace paper in your trucks with touch-screen tablets and automations to improve driver productivity and increase safety.

- ✓ Fewer trucks
- Less administration
- Happier drivers
- Satisfied customers

#### **Reduce complaints and go-backs**

Get real-time service and performance information from your trucks to help resolve complaints quickly and reduce the need for expensive go-backs.

# Capture revenue for extras

Generate more income from your routes by using alerts and automations to reliably detect when a collection has been made, ensure customers are billed correctly for weight, and to stop servicing people that haven't paid their bill.

#### Make collections faster and safer

Keep driver focus where it should be by using GPS and sensors to reduce, or even eliminate, the need for drivers to push a button when confirming service or taking a photo.

#### **Coach and on-board drivers**

Help new drivers get up to speed faster and seasoned drivers continuously improve their productivity and safety with easy-to-understand training based on personalized, real world, performance data. Routeware is the #1 fleet and route management solution for solid waste and recycling. We offer municipalities and haulers an integrated, end-to-end solution including optimization, planning, routing, dispatch, dashboards, reporting, analytics, and coaching.

# **In-Cab Features**

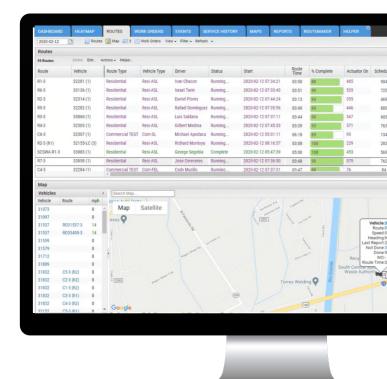

- Digital Vehicle Inspection Reports customizable pre- and post-trip checks with comments to identify safety issues.
- Real-time issue reporting record issues where a collection can't be completed, or a safety issue is identified.
- **Touchless photo automation** for trigger events such as skipped collections.
