

Fleet Management

Picture Service

Resolve queries faster, with real-time images from your trucks that are easy to find and share with customers.

- ✓ Greater responsiveness
- ✓ Enhanced productivity
- ✓ Reduced complaints
- ✓ Improved safety

Reduce go-backs with real-time images from your trucks

Use photographic evidence alongside GPS data to prove a container was not out and avoid costly and frustrating go-backs to the same locations.

Make photo capture safer and faster for drivers

Reduce distraction for drivers and cut the time they take at each stop by automating photo capture when an issue is recorded.

Plug revenue leaks by correctly billing for extras

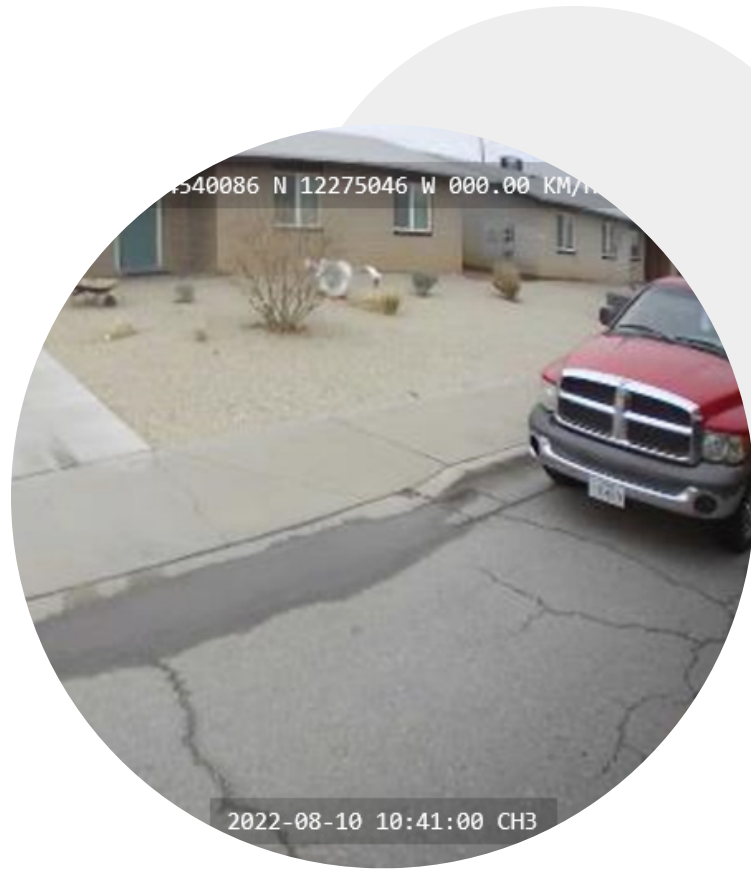

Use images of overflowing and additional containers alongside invoices to ensure correct billing and smoother payment.

Resolve complaints faster and reduce call volumes

Share photos with callers to quickly resolve complaints and disagreements and reduce the likelihood of future customer calls.

Features

- **360-degree cameras** - capture high-quality photos of events all around the truck.
- **Touchless photo automation** - for trigger events such as skipped collections.
- **High-definition color images** – make it easy for office staff and customer to identify detail.
- **Time- and geo-stamps** – provide robust evidence of when and where the photo was captured.
- **Easy find and search** – easy to find and use photos to help resolve complaints quickly.
- **Portal integration** - images are visible and available in back-office systems in real-time.
- **Photo to email** - drag and drop pictures to email to reduce issues with billing and make it faster to deal with complaints.

Hardware

- Up to 8 High-Definition (HD) cameras covering dashboard, side-arm, hopper or back-up views.
- Covers service areas to provide video evidence of issues such as not-outs and additional chargeable collections.
- 1080p HD image capture with wide-angle lens (90-125 degrees).
- Infra-red for after-dark operation (850nm).
- Reliable, industrial level design, passing strict vibration and high temperature tests.
- Able to be used anywhere outside or inside of the vehicle.
- Easily upgrade picture service cameras and hardware for video service.
