City of Lexington

From paper routes to multiple divisions using fleet automation tools

A 150+ truck municipal hauler, the City of Lexington's Urban County Government Waste Management department provides trash, recycling, and yard waste collection to a growing population.

Challenge

- Analog tools, such as paper route sheets, did not scale to meet growing service demand
- Fleet automation was perceived as a drastic and difficult change to make
- Operational costs were rising exponentially

Results

- Eliminated 10 trucks from the waste fleet
- Recouped fleet automation costs in one year with operational savings
- Expanded the use of technology to other City divisions and 40+ additional vehicles

"Lexington paid for the entire Routeware system via cost savings within the first year and has expanded use of Routeware into two additional divisions."

"Fleet automation becomes easy when using a phased approach and an experienced, reliable vendor."

Edward Dean
Technical Project Manager

About Routeware

Routeware is the waste and recycling industry's most trusted software and technology company. Our enterprise solutions help municipalities and haulers save time and money, increase efficiency, improve safety, and green up our world. Find out more at www.routeware.com
